

<p>Year 3 & 4 Points</p> <p>Please tell us how this session could be improved or altered. Or is there an additional session we could offer you around a specific element?</p>
<p>I think the session covers what parents need to know and would encourage any parent to attend. Something we use at work is a Japanese term 'kaizen' means continuous improvement. A more positive outlook than requires improvement. School is in good hands.</p>
<p>I would really love to learn more about SEN support. As a group like today or individual if there not much interest.</p>
<p>I don't have any suggestions at present, Thank you for today.</p>
<p>I do feel that sessions like these are a great way to understand how the school runs and how the children are, by seeing them in the classroom. Days/sessions of learning with the children or learning at local history with the children would be a great way to see how teaching is delivered.</p> <p>I've always been happy with the way the teachers have taught and cared for 3 of my boys. In particular I've felt that the care for my youngest and understanding how to engage him has been particularly excellent. Whilst the focus is on 'testing' of children for Ofsted I've always felt the relationship has been so ... with ..., that the teacher has understood his capability and what he does and doesn't know.</p>
<p>Nice to have various sessions in general to see how things are coming along and also you get to see things falling into place.</p>
<p>Session was completely detailed and satisfied. Additional sessions might be included along with what all are been focused for kids when they improve in between the academy and as a parent do we know their improvements.</p>
<p>I only have one child and the whole process of parenting a child through school is new to me. I welcome any future sessions which will help me understand the expectations of my child through school.</p>
<p>Would love to have an opportunity to see hows my child school day going. Observe at the lunch or play time or during lessons. As well as speak to their teachers about their education and emotional well being.</p>
<p>I thought it was really well thought out, if I had children with special needs or needed extra support it would be great to have that potion to see how they are supported in school. They don't personally but others could find it informative.</p>
<p>It would be good to hear more about the wellbeing of children, how are they being nurtured to do well, what procedures are in place to promote resilience?</p>
<p>Happy with the information covered in the sessions</p>
<p>Having more detail on the curriculum and topics learned each year would be helpful. – only so we can work on transferable skills at home.</p>
<p>Future sessions about day to day practices would be helpful, eg chance to comment on 'small' issues that definitely don't warrant a complaint or chat with the teacher – a feedback session essentially.</p>
<p>Probably a few more minutes in the class to see how it is run.</p>
<p>No improvements – I found it very informative and helpful. Maybe open to both parents to attend if possible. Thank you</p>
<p>A little longer spent in the classrooms. Maybe a specific element on additional support for children who get interventions. Etc about how they are supported to achieve their expected standard? Just an idea, thank you.</p>
<p>N/A</p>
<p>Just keep doing what you are doing.</p>
<p>A session on how SEND is backed into the curriculum would be helpful.</p>
<p>I would like to hear about wellbeing and mental health and how this is being dealt with/helped. As a person with mental health issues.</p>
<p>Would love to attend a session directed at SEND and how they are supported within Classes/outdoor play time.</p>
<p>N/A</p>
<p>Slightly longer in class or to observe if possible.</p>
