

Year 5 & 6 comments.

Please comment in general about the usefulness of the session

Nice to be able to face to face conversations about all aspects of school life at Westmoor. Personally, I do not have any issues with the school and feel I could ask any of the teachers if I had an issue/question. Overall, I feel it was lovely to be included in part of the curriculum planning.

Very useful explanation of the Ofsted report. You can see how hard the staffs are all working in preparation for the next time. Myself and my husband both think the report was very harsh and believe it is an excellent school and both our children have thrived during their time here. I think the session is excellent to show the school to the new parents who haven't been in due to covid. I am really sorry that the staff went through such an awful time because of the Ofsted report; you are all doing an amazing job. Just keep doing what you are doing.

Really useful, although session mainly focused on Ofsted report, I appreciated the honesty of the feedback on what happened, and how the inspection works.

I felt that this was useful with regards to explaining Ofsted, and the results. It helped me understand the outcome even though I didn't need to know as I know Westmoor is a good school regardless.

Very useful and informative of how the school runs effectively. A better understanding how OFSTED assess and grades.

A very interesting and informative session, giving more of an indepth view of the Ofsted report and the general way in which learning is taught at Westmoor Primary. A good insight into how procedures and a plan of how improvements are actively in place to improve the key areas in which the Ofsted report highlighted.

Excellent to see the school and staff. We all believe in Westmoor school and staff. Seeing throughout the last year 6 ... improve a lot only for help and support of Westmoor staff. Thank you for sharing this session. We know how good his school is. The work you do is unbelievable. Thanks again.

Very good to be able to sit with the head in a small group and hear first hand about issues facing the school. Given its significance, it was appropriate that the bulk of the session was given over to an exposition of the content of and circumstances surrounding the recent OFSTED inspection. This was illuminating and helpful. There wasn't time for much in the way of Q and A and it would be good if this could be built into future sessions. Overall the session was invaluable.

Really interesting to hear in more detail about the recent Ofsted inspection, and the measures that the leadership team and staff are taking to address some of the comments. It was also great to sit in the classroom for a while and see my daughter in the school environment. Thank you!

The session was an open and honest conversation around the Ofsted report. It was insightful to have the opportunity to sit in the classroom to see the ways of working.

I thought the session was very useful and I have learnt a lot about the processes of the school and how the children are taught. I was very impressed on how well the school has taken on board the Ofsted report and strived to do better and take on all the comments made in the report. I am sure they will do what they say.

It helped gain an understanding of how the school functions and how they plan to improve the Ofsted rating. It was also nice to have the opportunity to see my child in his class.

Session was really useful and insightful. We chose the school for the ...

Very useful in explaining the report and how it comes about also how things are to be improved/ ... good explanation of the mixed classes.
