

Reception comments**Please comment in general about the usefulness of the session**

It was great to get the chance to know more about how classrooms are organised and how two different age groups can sit together and share the same curriculum, since teachers know very well from where to start with each child and how different areas can be tackled within different ages. I really enjoyed going into ... classroom and getting to know what he is doing in the class.

It was lovely to hear about Ofsted from the schools point of view. Both of my boys are very happy attending Westmoor and their happiness is essential. ... is very excited to go into year 1.

It was lovely to see the whole school and see how amazing the school is run and the facilities for the children. I also loved the Head teachers and teachers positive, fun personalities which can be seen throughout the school.

It was very nice to be able to spend some time with the children. Good to have small parent groups, made it easier to interact with parents and meeting my child's friends. Being informed about the Ofsted Report and loved the honesty and clarity.

Very useful and clear, appreciate the transparency.

Excellent opportunity – thank you.

Seeing really is believing – was a pleasure to be able to spend time with Mrs Trundle and observe ... in his class. Thanks for taking the time out.

Useful to know the reasons behind the Ofsted inspection. Great knowing the teachers are making changes and benefiting the children's learning. The classrooms are very well organised.

Today's session was brilliant. It warms my heart and soothes my head to see why my son is thriving at this wonderful school. I appreciated the open, welcoming and insightful explanation of the Ofsted journey. I feel any grading is a poor representation of the obvious excellence this school shows at every level.

I have thoroughly understood and enjoyed the seeing is believing sessions, I was not completely sure of the mixed classes but walk away understanding and confident of how things work. It was also a lovely experience to see my child in his own classroom environment and being able to see how things work each day. I feel the school is always looking to involve parents and I am so pleased with this school.

I thought the session was really useful it was good to hear the schools side about the Ofsted report and what they have planned meeting the children in their class was great too. It gave me a better idea on what work they had been doing and what things they had in place like star of the day.

Really useful session, important given context of the Ofsted outcome, providing an explanation around that. Clear about the transition to year 1, reassured around how that works.

Really interesting to hear more about the classes and how lessons are taught to mixed classes.

Reassuring to hear more about Ofsted.

Super 'Changes' put in place.

Great to see more of the school.

It was reassuring to know the Ofsted rating isn't a reflection of what actually happens at the school/actual performance.

Explanation of the Ofsted process was very informative.

Really useful to understand Ofsted and what they looked at.

Also useful to understand the split classes and helpful to know how they are picked.

This was a good opportunity to come to school and get a better understanding of the size and feel of being in the school environment.

It's lovely to see the kids in the class in a lesson too.

I found the session really useful and informative. Helped with understanding what happened with Ofsted and also how the split classes will work.

Interesting to hear about the changes being put into place since Ofsted+ how the mixed classes work going forward after reception.

Good opportunity to ask questions.

Also son joined late, so good to look around school.

The session was very informative and relaxed. All questions answered.

The session was very informative and interesting I wasn't worried about the Ofsted outcome however the session explained well the situation. I found the info about the split classes and how this was decided very good and useful.

Great to know exactly how the year groups work.

I'm confident in the abilities of all the staff. Like many reports/inspections it was a case of paperwork not being exactly how Ofsted wants.

Good to hear the new frame works been put in place since the inspections.

How the split classes work and how the splits are implemented.

Good to meet staff and have time to hear from them.

Liked to hear how the children develop through whole school.

Enjoyed learning more about curriculum for key stage 1 and how the mixed classes work for ... moving up. Was great to see ... in the classroom environment and how she interacts with staff and other children in lessons.

It was useful having an insight on what the Ofsted evaluation meant and very good to know and understand how mixed classes work. Personally, I had no idea of these, and I would have asked whether I would not had this talk.
